

Olivier Leirman

One designer. Many brands. Shipped product.

Sole designer across a multi-brand **e-commerce design system**, two healthcare **SaaS products**, and an **industrial HMI**. Behavioral design and mobile UX baked in from a previous life as gamification consultant. Comfortable being the only designer in the room — and pushing back on the roadmap.

What I bring to your whitelabel app

01

Multi-brand design systems

Lead designer on the Baldwin x Hyva e-commerce DS — one Magento codebase, multiple branded storefronts. Same logic on Lochting/Meditech: shared system across pharmacy webshop and in-store kiosks. Tokens, components, brand-flag adaptation are daily work.

02

Mobile UX with behavioral depth

Patterns grounded in Mobbin and Baymard Institute research (paid membership). Behavioral design from co-running Engaging Heroes — Octalysis & SIMPSIS frameworks — applied to onboarding, retention and flow design without resorting to gamification gimmicks.

03

Solo ownership, end-to-end

Sole designer at Baldwin (3 product lines) and Hyler. Discovery interviews → problem framing → low-fi → production-ready Figma → side-by-side handoff with developers. Used to owning what and why, not just the pixel.

Recent work

Senior Freelance UX/UI Product Designer

AUG 2023 – NOW

MAGICAL SMILEY · OWN PRACTICE

Baldwin 2023 – NOW · LEAD DESIGNER ON 3 PRODUCT LINES

Baldwin x Hyva e-commerce DS — multi-brand Magento storefronts (component library, tokens, brand-flag adaptation). **Medipim** — SNOMED/AMT pharmacy PIM SaaS (3 organisation types, 8 user roles); pattern analysis, MVP feedback & analytics rollout (PostHog, A/B, replay). **Lochting / Meditech** — "Shopify for pharmacists" running on web shop + in-pharmacy Matic Pro/Slim kiosks. Same DS, two contexts, very different ergonomics. **Fraank** — apotheek-analytics platform; monochrome data-viz across gemeente / ATC / stock pillars.

Hyler 2025 – NOW · SOLE DESIGNER

HMI redesign for agricultural machines (hemp & flax processing). Bottom-up layout reasoning, on-machine readability, glove-friendly touch targets, status-first information architecture.

Co-Founder · Head of Product & Design

OCT 2020 – JUN 2023

FAIRYTALEWISE

- Built an **educational content brand from zero**: research, branding, MLP validation, mobile-first content, animation, merchandise, digital marketing.
- Created character worlds (Wisdom of Everything, Psychology of Everything, Jungle Realm, Realstickmen, Stress Champion) — reached **+10,000 individuals**.

Co-Founder · Behavior & Experience Design Consultant

JAN 2018 – JUN 2020

ENGAGING HEROES

- Gamification & behavioral design consultancy. Advised **Orange, Verhelst, Cashplannr, UFL** on attracting, engaging and retaining customers & employees. Taught **+4,700 professionals worldwide** the SIMPSIS Motivation & Human Drives framework on Udemty — foundation for how I read motivation and friction in product flows today.

■ Expertise

Multi-brand DS	Mobile UX	Whitelabel platforms
E-commerce UX (Baymard)	Discovery & research	
Gamification (Octalysis)	Behavioral design	
Design tokens	Accessibility (WCAG 2.1 AA)

Octalysis Framework — Yu-Kai Chou	2018
Gamification — Wharton (Coursera)	2018
Consumer Neuroscience — Copenhagen Business School	2019
Applied Scrum for PM — Univ. of Maryland	2019

■ Why House of HR

A whitelabel candidate app deployed across multiple HR brands is the exact problem space I work in daily — one product, many brands, real consequences when the system breaks. Add a sole-designer setup, mobile-first scope, and a hybrid Kortrijk team: it's the role I'd build for myself if I could.

PS — this CV is itself a **whitelabel exercise**.

Same content, deployed in House of HR's visual system (Nunito 900 · #1D153E · #EB005A · sharp corners · Happy-Rebel typography). I can render the same content in any brand system I currently maintain — proving the multi-brand thinking your candidate app needs, before we even meet.
