

SENIOR UX/UI PRODUCT DESIGNER · FREELANCE

Olivier Leirman

I'm a senior UX/UI product designer with experience across web design, e-commerce, SaaS, and industrial HMI interfaces. I work on multi-brand design systems and digital products that need to scale across brands & touchpoints. My background in business economics, gamification, and behavioral design helps me challenge assumptions, question features, and shape what gets built.

WHY HOUSE OF HR

What makes this role especially interesting to me is the combination of mobile product design, multi-brand complexity, and real product ownership. While most of my shipped work has been in web, e-commerce, SaaS, and HMI, the underlying challenges — clear flows, touch-first interactions, and scalable systems — translate naturally into mobile. On a practical level, the location is also a better fit. Working closer to home means less time commuting and more energy going into the work itself.

WHAT I BRING TO THE TABLE

01

Multi-brand design systems

I design products that scale across brands, touchpoints, and use cases — without losing clarity or consistency. (Baldwin × Hyva design system, Lochting, Meditech)

02

Cross-platform UX experience

From web and SaaS to e-commerce and touch-based HMI, I'm used to designing for real users in real contexts.

03

Behavioral design mindset

My background in gamification and behavioral design helps me improve flows, motivation, and completion in a practical way.

04

Product ownership

I'm comfortable challenging assumptions, questioning features, and helping shape what gets built — not just how it looks.

RECENT WORK

UI/UX PRODUCT DESIGNER

APR 2024 — NOW

BALDWIN · 4 DAYS/WEEK · HYBRID · FREELANCE

Sole designer across all projects, owning design from concept to handoff in close collaboration with Romanian and Belgian developers.

- **Webdesign** projects (Parte and others).
- **E-commerce** projects (Weba, Optimus Instruments and others).
- **SaaS platforms** (Lochting, Medipim).
- **HMI** for vending machines & kiosks (Meditech).

UI/UX PRODUCT DESIGNER

APR 2024 — NOW

HYLER · 1 DAY/WEEK · FREELANCE

- **HMI redesign** for the agricultural machines (hemp & flax processing).

FREELANCE DESIGNER & CONSULTANT

JAN 2018 — NOW

ENGAGING HEROES · SELF-EMPLOYED

What started with gamification, motivation, and behavioral design evolved gradually into hands-on UX/UI work across web, e-commerce, SaaS, and touch-based interfaces.

- **Gamification & Behavioral Design** — advised startups and larger organizations on engagement, retention, and performance.
- **Product Design** — designed flows, interfaces, and systems across digital products and platforms.
